MULTI-STORY BUILDINGS

HALL SYSTEMS

SINGLE-STORY BUILDINGS

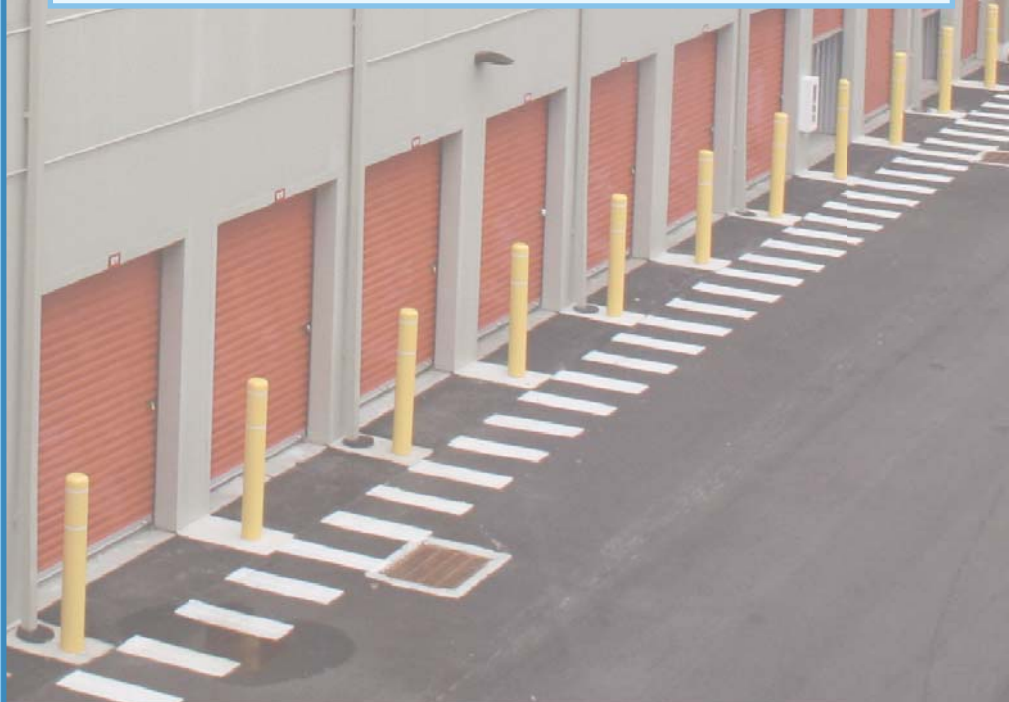

PORTABLE BUILDINGS

We specialize in the design and construction of self storage facilities. Whether you are starting out with a single or multi-story building, we can help you. All of our storage buildings utilize top quality galvanized framing with galvalume partitions. Optional exterior finishes offer a wide variety of appearances to meet any local building codes. Flexible design ensures that your storage facility can be designed to meet the specific needs of your local market.

Our services include:

- ♦ Site layout and design
- ♦ Complete in house drafting and engineering
- ♦ Manufacturing of our own products
- ♦ Building erection by our experienced and highly trained crews.

SAMS offers multi-story self-storage buildings that are ideal for urban areas. Constructed of high quality structural and cold formed steel, the SAMS multi-story self-storage building is designed to meet all local and state building codes.

We can design your self-storage facility to make the most effective use of your space, suggest the most cost effective materials to use, and supply you with certified labor experts to get your job completed in a timely manner.

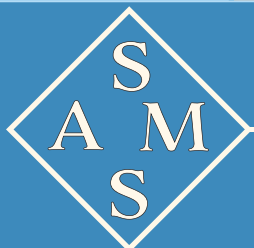

Interior freestanding hall systems are available in both flush and corrugated configurations. Optional diamond-plate covers are available for protection and beautification, along with burglar bars or wire mesh over units for added security. Our freestanding hall systems can be used to convert pre-existing structures into storage facilities.

Our portable storage buildings offer rentable space where construction is prohibited. Constructed of the same high quality materials as our standard self-storage buildings, our portable self-storage buildings come standard with galvanized framing, painted exterior panels, galvalume roof, and roll-up doors. We offer these portable units in a variety of standard layouts or they can be customized to suit your needs.

Because of building codes and H.O.A. restrictions, many boat and RV owners need a place to store their RVs. Our RV storage systems are available in both open or closed storage configurations and can accommodate all sizes of RVs.
